## **STRENGTHEN YOUR SIXTH SENSE: EPROW IMAGES GOES BEYOND PROBLEM SOLVING**

Los Angeles, CA... EPROW Images, a haven for innovative thinkers, was developed to support creative people as they increase their trust in their inner voice or sixth sense.

Virginia McBride, founder of EPROW Images, calls it the “tummy test,” essentially paying attention to the “turning in your gut.” You remember the times you didn’t listen to your “gut” instinct... those are the times you made a costly mistake, selected an incompetent vendor, lost your best client, invented a “better mouse trap” that no one wanted to buy.

For people who want to strengthen their sixth sense, their subtle perception ability, not simply solve a problem, EPROW Images offers five service areas to meet a range of needs.

**GAZOOGO** focuses on clients that are in early stages of their thinking. These clients seek clarification and simplification of their dreams. They need to define precisely what they want to achieve.

**STRATEGO** focuses on clients that want to develop action plans for bringing their dreams to reality. Each plan identifies time frames, milestones, and descriptions of the desired reality.

**OPINEGO** focuses on clients who want specific learning in areas where they feel that they need help. For this service, clients define their learning needs. Then, specialists in that learning area work with them until the desired learning is achieved.

**SAGITUR** focuses on clients who want a strategic partner throughout an entire project. In most cases, these clients complete all of the work related to the previous services before they are considered for **SAGITUR**.

**PAPPY** focuses on the building of relationships through The PAPPY Program. PAPPY = a “P”..... (Problem, Plan, Preparation, or Project, Partnership).

Each pitch connects to a specific service... Problems to **GAZOOGO**, Plans to **STRATEGO**, Preparations to **OPINEGO**, Projects to **SAGITUR**, and Partnerships to all aspects of **PAPPY**.

EPROW Images clients take charge of their futures with full ownership of everything created belonging to them, not EPROW Images. Clients define the trail they want to create.
